The skill development programs run by the Centre for Continuing Education Kerala (CCEK) in co-ordination with the NSDC TP through the Continuing Education Cells have left an indelible mark in Vocational Training.

It promotes exceptional performance and follows a well structured academic pattern. The project being accessible and affordable makes it unique. Above all, the fact that it offers a Government recognized certificate at an affordable fee and a National Level certification from National Skill Development Corporation makes it highly valued as it complies with the curriculum of the National Occupational Standards (NOS).

I do strongly support CCEK's future endeavors in the context of its exemplary current performance.
