

To,

IIB Education

National Skill Development Corporation – TP

Greetings from Government Polytechnic College Kaduthuruthy.

There are a number of Vocational Training Programmes currently being run at the educational institutions across the state. I, personally kept a suspicious approach to all of them as my personal experiences led me that way. However, The CCEK Programmes, came to my special notice since the CE Cell of the Colleges very much fall under the ambit of my administration.

A close observation of the CCEK's Academic Programme and its structured system soon attracted my attention. From the conduct of classes, maintenance of Academic Records, sequence of practical labs and examinations etc. stood very close and parallel to the formal education system. I was really impressed by this augmented performance levels by a government led Skill Development Programme.

As the curriculum of CCEK courses have already been brought under the scope of NSDC, (National Skill Development Corporation) it would comply with the National Occupational Standards (NOS). Thus, the students are entitled to get an additional certification subject to the NSDC compliances would certainly allude to its National level recognition.

Let me confess that I am really impressed by the current level performance of the CCEK. Hope they would strive to make it even more efficient in the years to come.

By,

Principal
