

It is my most singular ever experience with a government body that performs with high amount of efficiency and transparency in execution levels. The Skill Development Programmes run by the Centre for Continuing Education Kerala (CCEK) across the state in coordination with the NSDC TP through the Continuing Education Cells of every government, Govt. Aided Institutions marks an indelible presence in the history of Vocational Training.

It orchestrates exceptional performance levels and appears to be following a well knitted Academic System from start of the batches, maintenance of academic records, conduct of academies sessions (theory & practical classes) examination and certification etc. draws a fine algorithm that reflects a well-organized system behind it.

The factor of accessibility & affordability makes the project unique, over above the fact that it is able to extent a Government recognized certificate for an affordable fees and a National Level certification from National Skill Development Corporation which makes it absolutely valuable in terms of recognition as its curriculum comply to the National Occupational Standards (NOS).

I do very strongly support CCEK's future endeavors in the context of it exemplary current performance.
