IIB Education

National Skill Development Corporation-TP

Greetings from T.K Madhava Memorial College Nangiarkulangara, Alappuzha

We are extremely happy to work in hand with Centre for Continuing Education Kerala in upbringing and improving employability of students. Our College has been conducting the Skill Development Programmes attached to Continuing Education Cell(CE Cell) for the past few years. We are aware that this Programme is helpful for students from the lower walks of life in our society as CCEK courses are quite within the affordable brackets and allows double certification in a short duration. This makes these courses really worthfull and chances of employability is augmented in every respects. The Industrial Internship and Placement assistance supplementing this Programme is added advantage.

We convey our best wishes and whole hearted support for this skill development Programme through which thousands of students are benefitted every year.
