To  
IIB Education,  
National Skill development Corporation

**Greetings from Government College Kottayam....!**

I firmly believe that the programmes in Centre for Continuing Education Kerala (CCEK) impart Skill Development Programme that goes almost parallel to the formal education stream of the state with a definite calendar of academic events. It has drawn my attention to notice that being a Government initiative, it has come a long way to the current level of performance which exhibits a fine performance especially as it follows a well-defined Academic Calendar.

It orchestrates a wide spectrum of courses with coverage in the subject level curriculum. Each subject contains various Qualification Packages (QP's) aligned to that subject. Further, it is interesting to know that CCEK programmes work in close coordination with the NSDC (National Skill Development Corporation) directives.

The most remarkable achievement of this programme is that it throws the doors open to a wide spectrum of courses and its curriculum has been mapped to the NSDC scheme where it is complying to the National Skill Qualification Framework (NSQF).

The affordability of the programme, payment option in installments, availability of centers across the state, dual certification etc. makes it a unique Vocational Training Programme.
